

TRAPEZE RINGS, HANDLES & ACCESSORIES

A. NYLON TRAP HANDLE

A contoured safety grip and a wire guide prevent hand contact with wire. A recessed cavity in the base holds the nicropress oval and shields the sailor from sharp wire ends. Each.
27-0412 \$4.60

B. RONSTAN TRAP HANDLE

Add color and comfort with Ronstan's molded nylon trapeze handle. Skipper and crew's trapeze can be color-coded for easy identification. Green has been discontinued by the manufacturer. Each.
21-0171R Red \$9.85
21-0171B Blue \$9.85

C. REPLACEABLE TRAP HANDLE

Foam-covered aluminum handle is easily installed onto existing trapeze wire. Carry a spare as a temporary repair, then replace the wire at your convenience. Each.
07-2010 \$20.95

TIP If a trapeze handle has been broken, a single trapeze wire can be purchased. Please refer to page 52.

D. CAN'T HURT

A light and flexible alternative to "hard" stainless steel dogbones. Black high pressure nylon tubing covers 1/8" (1x19) stainless wire. Pair.
01-0123 \$18.50

E. CAN'T MISS

Designed to allow the sailor to hook-up without even looking at his trapeze hook. This lightweight, extra-wide hook-up ring has a center-hold handle with molded finger ridges. Double swaged 1/8" (1x19) wire is coated with black or clear high pressure nylon tubing. Pair.
01-0124BK Black \$26.00
01-0124CL Clear \$26.00

F. DOGBONE

Original equipment for Hobie® trapeze systems. 6" long with 1-1/2" rings. Each.
25-3610 \$15.25

G. 7-1/2" ELONGATED RING

Easy-to-hold short keyhole with two adjustment positions. 7-1/2" long with 1-7/8" ring. Each.
25-3620 \$12.00

ROPE LOCK

Easy-to-adjust black rope stop and lock for trapeze height adjustment. Standard on Hobie®, Nacra and Prindle. Double-up back-to-back for extra strength. Each.
01-0120 \$2.25

SMALL BULLET BLOCK

As used in our No-Cut EZ-Up Trap Ring Return Kit. 1-3/16" sheave, Teflon® bearing. 5/16" line capacity. Each.
23-0911 Small Bullet Block \$7.00
23-0912 with Removable Sheave \$8.50

CLAMCLEAT® WITH ROLLER

Allows for 2:1 trapeze adjustment while hooked up. Line rolls easily on large base roller. 1/4" line capacity. Each.
27-0253 \$25.60

HARKEN® MICRO SINGLE BLOCK

A premium quality block for your trapeze return system. Either swage in place or hang with #21-0615 shackle. Block has 7/8" sheave, Delrin ball bearings and 1/4" maximum line capacity. Safe working load is 200 lbs.; breaking strength is 1200 lbs.
28-0224 \$10.10

RONSTAN BACK-TO-BACK BLOCKS

As used on the Murrays No-Cut Hi-Low Trapeze Adjustment Kit. Ball bearing blocks with 3/4" sheaves and 1/4" maximum line diameter. Max. working load is 550 lbs.; breaking strength is 1210 lb. Each.
21-2028 \$21.75

NACRA CROSSBAR END CAP

This PVC crossbar cap protects the crew and gives a finished appearance. Use on the rear crossbar as is or drill to accommodate shock cord on front crossbar.
56-3503 \$27.50

"KEY-HOLE" CONNECTORS & SPREADERS

For safety-minded sailors, the low profile Key-Hole system offers many advantages over the traditional hook design. Choose from three different connector types. See page 46 for complete details.
