

MAST SUPPORTS & STEPPERS

WHY USE A MAST SUPPORT?

A mast cradle or support protects your cat's mast and traveler track while trailering. Although life jackets or towels may seem like easy, inexpensive solutions, they tend to slip during transport and suffer damage in their own right. It's worth protecting your boat investment by using a good mast support.

HOBIE® MAST CRADLE

This Wave-style cradle is a perfect and inexpensive solution for almost all Hobie Cats®, including H14, 16, 17, 20 and 21SC. Sturdy fiberglass construction with carpet to protect crossbar and mast. Securing the mast is quick and easy with integrated shock cord. If your boat's tiller crossbar is above the rear crossbar when your boat's rudders are locked in the up position, you will need to remove the tiller crossbar.

STAINLESS REAR MAST SUPPORT

Strong and secure, trailer mounted, permanently attached support features heavy-duty, box stainless steel construction with carpeted cradle and hinged upright. Mast support extends 4-1/2" aft of rear trailer hull support. Mast rides about 30" above trailer. To launch, the support easily hinges to 90° away from the boat. Universal mount included.

HAND WINCH

Mounts on the front trailer mast support and aids in launching and mast stepping. 850 lb. capacity. We recommend using 25 feet of 3/16" 8-strand low-stretch line (#39-2311BK black).

13-9272 \$37.95

EZ STEP™ MAST RAISER

If you want easy, single-handed mast stepping, this is the kit for you! A simple gin pole arrangement stabilizes the mast so one person can raise and lower it. It requires a trailer winch (#13-9272), or you can use your block and tackle (mainsheet) for off-trailer use. Trapeze wires snap in place and are used to eliminate side-to-side sway. Works best with masts that don't need to be turned to the side for stepping; another person is required in that case. Attaches quickly, without tools or modifications to the boat. Rustproof aluminum and stainless steel construction. Weighs less than 5 lbs. and adjusts to fit any cat.

TRAILER BOXES

THE ULTIMATE, LIGHTWEIGHT STORAGE LOCKER!

SPORT Locker Max

SPORT LOCKER MAX

Performance Sports Intl. has created the ultimate box for your sailing lifestyle. The Sport Locker Max will hold all your boat and sailor gear, tool boxes, camping gear, even beach chairs. The long, low, wide design is ideal for trailer mounting. The sliding top front door provides access for quick, easy packing and removing of bulkier accessories and sailing gear. The hinged-angle rear door facilitates visibility and removal of longer catamaran sails and equipment. Shipped by truck directly from the manufacturer, the one-piece fiberglass box comes assembled and ready to use. The very roomy box measures 10'10" x 3'3" x 14" and has both top and end access.
