

TORQEEDO 2010

Torqueedo Cruise 2.0 and 4.0 models

The ultimate outboard for boaters on green lakes and sailors who prefer electric propulsion. Torqueedo Cruise models are a class of their own when it comes to power and efficiency. Efficiency is especially important for electric outboards as batteries supply only a limited amount of power. Due to their unique level of efficiency, Torqueedo Cruise models deliver up to twice the range from the same battery supply.

The power of these emission-free motors is also impressive— The Cruise 4.0 model delivers the thrust of a 10 hp gas outboard. It can move sailing boats up to 6 tons with a speed of 6 knots. A well-stocked 24" pontoon boat with 7 people aboard will be moved at 6 mph.

In a display integrated in the remote throttle, the Cruise R models provide accurate information on battery charge, speed over ground, power consumption and most importantly: remaining range based on the current speed. The speed and range data are calculated using an integrated GPS-receiver.

Cruise 4.0 R Specifications

- Power:** Input power 4,000 W, output power 2,040 W (comparable to 8-10 HP gas outboard)
- Static thrust:** 214 lbs
- Battery:** Not included, capacity of >120 Ah @ 48 V required
- Propeller:** 12" x 10"
- Steering:** Prepared for connection with standard remote steering system, remote throttle
- Gearing:** F-R continuously variable
- Weight:** 40 lbs.

Model	Volt	Shaft	Throttle	Display	Item #	Retail
Cruise 2.0 S	24	24.6"	tiller	no	71-1205	\$2,699.00
Cruise 2.0 L	24	29.6"	tiller	no	71-1206	\$2,749.00
Cruise 2.0 RS	24	24.6"	remote	yes	71-1209	\$3,199.00
Cruise 2.0 RL	24	29.6"	remote	yes	71-1210	\$3,249.00
Cruise 4.0 RS	48	24.6"	remote	yes	71-1211	\$3,699.00
Cruise 4.0 RL	48	29.6"	remote	yes	71-1212	\$3,749.00
